MINECRAFT EDUCATION CLUB BY LEARN AND PLAY

Minecraft could be considered an online, updated version of the classic Lego building blocks, which are connected and assembled to create a practically limitless variety of structures. The same is true for Minecraft, except that instead of handling building blocks, users operate in a virtual world, using pixelated cubes. The main limitation is the user's imagination. Minecraft gives users the additional advantage of being able to play safely with water, earth, fire, trees, and other natural elements. The Education edition is a game-based learning platform with standards-aligned content across Grade 1 - 8 subjects and special features designed for classroom use.
